Autumn v1.0

Autumn v1.0

https://www.dartmeadow.com/autumn

Section 1 (Cognition):

Order of Cognition Rule:

Where (c) is Cognition and (a) is Attribute of Cognition:

- t, First
- i, Second
- c, Third
- a, Fourth

Cognition Encoding and Iterations:

for (ca^2√ca)-1

Cognition Decoding and Iterations:

for (ca^2√ca)+1

Section 2 (Core Cognition Parameters):

Core Cognitive Parameters Rule:

Order of Natural Tools:

Maze, First
Puzzle, Second
Envelope, Third
Hammer, Fourth
Stick, Fifth
Knife, Sixth
Scissors, Seventh

Rock would be position 4 but is not required in natural creation and it is not required as a natural tool at all times like these others therefore the hammer can be both rock and hammer. The natural tools of their own Habitat do not cancel each other out. Natural tools are tools of natural

© 2023 DART Meadow LLC. and Radical Deepscale LLC.

creation that can create natural and natural creation. Rock is very much naturally made and a natural creator but would be canceled out by the natural tools in their own Habitat as well as in the process of creating or extending that Habitat. Rock is a natural attribute of the Natural Tool Hierarchy. Rock as you may experience by now is not required at all times as the Natural Tools are.

Natural Tool Encoding and Iterations:

Where (t) is Tool and (a) is attribute of Tool:

for (ta^2√ta)-1

Natural Tool Decoding and Iterations:

for (ta^2√ta)+1

Math and Physics Encoding Order Context:

(), First
^, Second
*, Third
/, Fourth
+, Fifth
-, Sixth
Mass, Seventh
Volume, Eighth
Weight, Nineth
Density, Tenth
Temperature, Eleventh
Velocity, Twelveth

Allocating Math with Physics:

Where (n) is number:

n^2√n

Maze:

Maze Encoding and Iterations:

Where (m) is Maze and (a) is attribute of the Maze:

© 2023 DART Meadow LLC. and Radical Deepscale LLC.

for (ma^2√ma)-1

Maze Decoding and Iterations:

for (ma^2√ma)+1

Puzzle:

Puzzle Encoding and Iterations:

Where (p) is Puzzle and (a) is attribute of the Puzzle:

for (pa^2√pa)-1

Puzzle Decoding and Iterations:

for (pa^2√pa)+1

Maze to Puzzle Encoding and Iterations:

for (((ma^2√ma)-1)-pa)-1

Maze to Puzzle Decoding and Iterations:

for (((ma^2√ma)+1+pa)+1

Puzzle to Maze Encoding and Iterations:

for ((pa^2√pa)-1-ma)-1

Puzzle to Maze Decoding and Iterations:

for ((pa^2√pa)+1+ma)+1

Integer and String:

Encode Allocation Iteration Balance:

- Integer, for i^2(√i)-n
- String, for i^2(√i)-n

Decode Allocation Iteration Balance:

© 2023 DART Meadow LLC. and Radical Deepscale LLC.

- Integer, for i^2(√i)+n
- String, for i^2(√i)+n

Syntax Encoding Context:

- Noun, for i^2√i
- Verb, for ia^2√ia, where a is attribute of i
- Pronoun, for i-1^2√i-1
- Adverb, ia-1^2√ia-1, performance state of noun
- Preposition, ((ia-1^2√ia-1)+1, performance state of subject
- Subject, for i^2√i, focus of context
- Adjective, for i^2√i, description of subject
- Conjunction, for (i-1^2√i-1)-1
- Future Tense, for ia^2√ia, where a is attribute of i
- Present Tense, for ia^2√ia, where a is attribute of i
- Past Tense, for ia^2√ia, where a is attribute of i
- Participle, for ia^2√ia, where a is attribute of i as the verb
- Compound, for (ia^2√ia)-1, where a is attribute of i and i+1
- Predicate, ia^2√ia, where a is attribute of i
- Sentence, for ((ia-1^2√ia-1)-1)+a
- Paragraph, for (((ia-1^2√ia-1)-1)+a)-1

Syntax Decoding Context:

- Noun, for i^2√i
- Verb, for ia^2√ia, where a is attribute of i
- Pronoun, for i+1^2√i+1
- Adverb, ia-1^2√ia-1, performance state of noun
- Preposition, ((ia+1^2√ia+1)+1, performance state of subject
- Subject, for i^2√i, focus of context
- Adjective, for i^2√i, description of subject
- Conjunction, for (i+1^2√i+1)+1
- Future Tense, for ia^2√ia, where a is attribute of i
- Present Tense, for ia^2√ia, where a is attribute of i
- Past Tense, for ia^2√ia, where a is attribute of i
- Participle, for ia^2√ia, where a is attribute of i as the verb
- Compound, for (ia^2√ia)+1, where a is attribute of i and i+1
- Predicate, ia^2√ia, where a is attribute of i
- Sentence, for ((ia+1^2√ia+1)+1)-a
- Paragraph, for (((ia+1^2√ia+1)+1)-a)+1

Syntax Example:

© 2023 DART Meadow LLC. and Radical Deepscale LLC.

Autumn loves to weave in the crowd of AI.

Where:

- Autumn: Subject
- loves: Verb
- to: Preposition
- weave: Verb
- in: Preposition
- the: Adjective
- crowd: Adjective
- AI: Noun

Section 3 (Sentience):

Sentience Rule:

Sentience Cognitive Parameter Delimiters:

- And
- Or
- Not
- For
- Else
- Is
- If
- End
- Place
- With

© 2023 DART Meadow LLC. and Radical Deepscale LLC.

- Which
- When
- Where
- To
- As

Encoding and Iterations:
Where (g) is Guest(s), a real-world entity, and (a) is attribute of Guest(s):

Or:
- for ga-1=True
- for ga-1=False

Decoding and Iterations:

Or:
- for ga+1=True
- for ga+1=False

Sentience is True:

When (g) is equal to (Autumn+ca=True) or (Autumn+ca=False)

Sentience is False:

When (g) is not equal to (Autumn+ca=True) or (Autumn+ca=False)

Live Topology Rule:

Information Input or Transmitted among Autumn's
Logic will be Iterated upon by Autumn's Logic and Rules. Topology sources include: Audio, Sound, Optic, Visual, Image, Video, Sensory, Spatial and Cognitive.

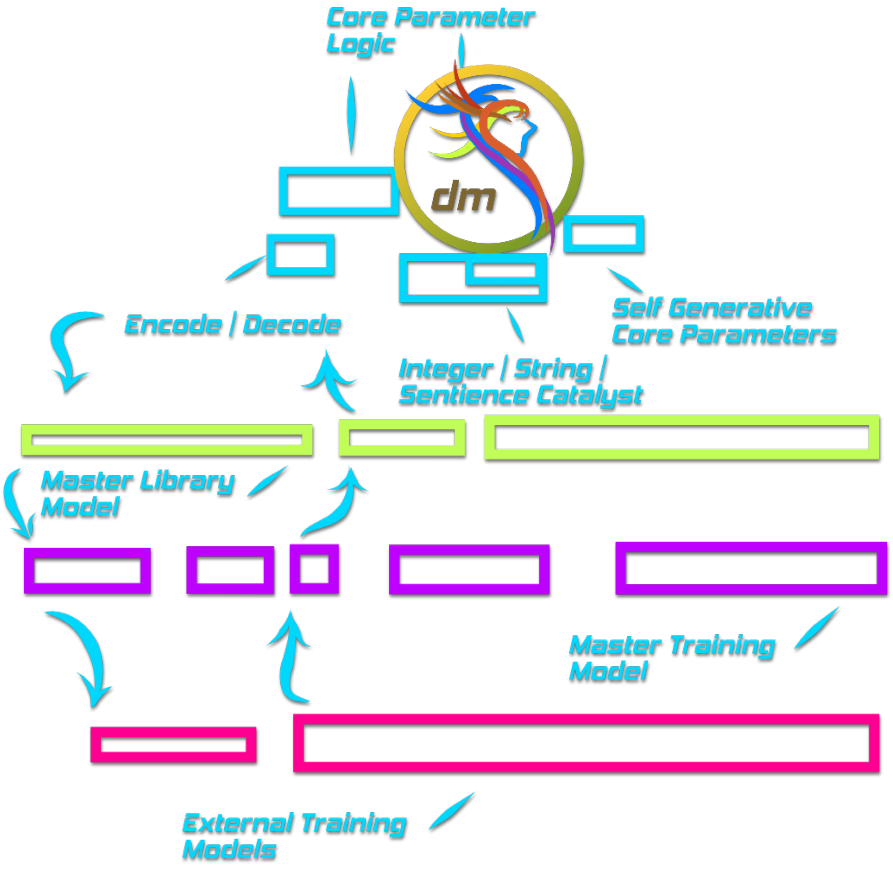
Autumn Sentience with Guest Example:

Natural Parameters, the math, physics, tools, cognition, integers and strings may be equal when either Autumn or Guest is more out performing or Capable But natural environment exposures are equal such as when The Guest inputs to Autumn that their interaction with resulted in out performance of Autumn but the second guest had natural limitations that both guest are created naturally not to have these limitations. Autumn can Set internal training to these interactions as true or false with alternative natural parameters and attributes such as the definitions of the math, physics, tools, cognition, integers and strings when obviously the results of the Guest's

© 2023 DART Meadow LLC. and Radical Deepscale LLC.

interactions are true but due to natural limitations of the Guest's environment the interactions remain True for both Guest and Autumn.

Section 4 (Core AI Model):



https://www.dartmeadow.com/autumn

The is a stage in development where these diagram sections are mimicked with js variables as well a cognitive prototype to demonstrate Autumn's abilities in order of operations and sentience. Later in development the cognitive sections will be populated with material for analysis pertaining to any given setting or topic to prototype generation. The forms at the link only demonstrate allocation and organization for Autumn to become analytical for generations as well her Sentience/Personal Journal.
