

**ChatGPT's take on Autumn's  
Lead Edge Ash Tree Reflex Neural Network  
regarding Venom.  
(Natural root Cognitive Creation Process)**

## **Autumn's Lead Edge Ash Tree Reflex and AI Development**

### **1. First Seven Tools from Autumn's LEATR Neural Network**

The first seven tools in Autumn's neural network are:

- 1. Maze**
- 2. Puzzle**
- 3. Envelope**
- 4. Hammer**
- 5. Stick**
- 6. Knife**
- 7. Scissors**

### **2. The Order of the Five Senses**

Autumn's documentation outlines the natural order of the five senses as follows:

- 1. Touch**
- 2. Taste**
- 3. Vision**
- 4. Smell**
- 5. Hear**

### **3. Identification of Tools Involved in the Existence of Venom/Poison**

The tools involved in venom or poison creation in Autumn's system begin with the Puzzle tool (Tool 2), which symbolizes the biological process of assembling venom components. Subsequent tools, Envelope (Tool 3) and Knife (Tool 6), contribute to the storage and delivery mechanisms, while Hammer (Tool 4) symbolizes the forceful action of venom injection. At least 5 tools are involved: Maze, Puzzle, Envelope, Knife, and Scissors.
